PEOPLE
A BRIGHTER TOMORROW

FACTORY OPERATIONS

Factory – Production Planning

Planning and production schedules

Plan production efficiently based on demand, inventory and available resources.
Ensure timely production, optimal utilization and consistent quality.

Demand Planning
PLAN WITH CONFIDENCE

- Sales forecast and demand planning
- Plan based on orders and inventory levels
- Seasonal and festive planning
- Adjust for raw material availability

Production Scheduling
OPTIMIZE RESOURCES

- Create production plans and work orders
- Batch-wise and product-wise scheduling
- Machine and manpower planning
- Reschedule with ease

Production Execution
TRACK IN REAL TIME

- Issue materials to production
- Record batch production and yields
- Track WIP (Work in Progress)
- Capture actual vs. planned quantities
- Monitor production efficiency

Monitoring & Reports
MAKE BETTER DECISIONS

- Production status dashboard
- Plan vs. actual comparison
- Batch-wise production reports
- Yield and wastage analysis
- Resource utilization reports
- Timely alerts and exceptions

Plan — Based on demand and inventory →
Schedule — Optimize resources →
Produce — Execute and record →
Monitor — Track performance in real time →
Deliver — Finished goods to stores

TOMORROW

FACTORY OPERATIONS

Production & Batch Management

Production, yield, consumption

Execute production as per plan, capture actuals, manage batch-wise details and track material consumption and yields for consistent quality and full traceability.

Execute Production
Create production orders from planned schedules.

Batch Management
Auto-generate and maintain batch-wise production records.

Material Consumption
Track raw material usage against production and recipes.

Yield Tracking
Record planned vs. actual yield and analyze variations.

Multi-Stage Production
Support for multiple production stages and processes.

Full Traceability
Link batches to recipes, ingredients and quality checks.

1 Issue Materials
From stores to production

2 Production
Manufacture as per plan

3 Yield & Consumption
Track actuals and variances

4 Batch Completion
Finished goods with full traceability

Quality & Compliance

- In-process quality checks
- Batch-wise quality test results
- Hold / release batches
- Capture rework and rejection details
- Ensure compliance with food safety standards

Key Benefits

- Accurate production tracking
- Better resource utilization
- Reduced wastage
- Consistent quality
- Complete batch traceability
- Improved profitability

BUSINESS OPERATIONS

Security & User Management

Control. Protect. Grow.

Ensure data security and operational control with role-based access, user permissions and audit trail for accounts. Keep your bakery business safe, efficient and ready for the future.

Role-Based Access

- Define roles as per your business needs
- Restrict access to relevant modules and data
- Maintain operational control

Flexible Permissions

- Module-wise permissions
- View / Add / Edit / Delete controls
- Assign users to multiple outlets/ departments
- Customize access levels

Accounts Audit Trail

- Track changes in accounts vouchers
- Monitor who created, modified or deleted
- Ensure accountability and transparency
- Maintain complete history

Control on MIS

- Decide who can view which reports
- Restrict sensitive business information
- Keep your data confidential and secure
- Enable better decision making
